## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claim 1 is objected to because of the following informalities: In line 4, "sufficient of a deflocculant" is confusing. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 and 10-16 are rejected under 35 U.S.C. 102(b) as being anticipated by

Shulman et al, US 5,409,629.

Shulman et al teach acrylic acid/ethyl acrylate copolymers for use in liquid laundry detergents (see abstract). An example of such a composition comprises from 0.5 to 5% acrylic acid/ethyl acrylate copolymer, up to 25% corrosion inhibitor, and up to 5% graying inhibitors (either the corrosion inhibitor or the graying inhibitor satisfies the auxiliary stabilizer limitation of the present claims) (col. 7, claim 1).

*Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shulman et al, US 5,409,629 in view of Cao et al, US 4,931,195.

Shulman et al are relied upon as set forth above. Note that additional stabilizers are taught by Shulman et al as suitable in their liquid detergents (col. 4, lines 3-8). Shulman et al do not specifically teach the addition of clays as stabilizers. Cao et al teach liquid laundry detergents containing organophilic modified clays as stabilizers (see abstract). Such clays are well known in the detergent arts to stabilize liquid detergents. It would have been obvious to one of ordinary skill in the art to prepare a liquid detergent containing two well known stabilizers, based on the teachings of the prior art, and so render obvious the present claims.
